## 问题 2

Ordinary culture has different attitudes to plagiarism. In the West the writer is the sole creator or originator of his or her work. Therefore plagiarism is a violation against the writer and is viewed as morally wrong. However, other cultures do not regard plagiarism as a sin and do not view it as wrong. In other cultures the ability to repeat the thoughts of others is such an important skill that it is regarded as good. In such cultures, whether you can repeat words from writing or other language, you must put together words around those words, and you must say them through the individual's own way.
